Professional Summary

Computer Science undergraduate at NED University of Engineering & Technology (CGPA: 3.566/4.00) with hands-on experience building full-stack applications using Next.js, React.js, NestJS, Node.js, PostgreSQL, and MongoDB. Experienced in RESTful API development, authentication, role-based access control, database design, and Dockerized applications through internships at JBS and 10Pearls.

Technical Skills

Languages: JavaScript (ES6+), SQL

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3

Backend: Node.js, NestJS, Express.js, REST APIs

Databases: PostgreSQL, MongoDB, MySQL

Auth & Security: JWT, bcrypt, RBAC

Tools: Git, GitHub, Docker, Postman, VS Code

Integrations: Cloudinary, Nodemailer

Experience

Software Engineering Intern – JBS

Jun 2026 – Aug 2026

Karachi, Pakistan

- Built and worked on two full-stack applications, **InTrack** and a Lightweight Transportation Management System (TMS), using Next.js, React.js, NestJS, PostgreSQL, TypeORM, and Docker.
- Developed role-based workflows and portals for different user types, including interns, managers, buddies, administrators, dispatchers, and carriers.
- Implemented RESTful backend functionality, authentication, database-driven workflows, operational notifications, document handling, and integrations using Cloudinary and Nodemailer.

Data Science Intern – 10Pearls

Dec 2025 – Feb 2026

Remote

- Worked on data processing and analysis tasks in a collaborative enterprise environment while gaining exposure to practical data science workflows.
- Collaborated with team members using Agile practices and contributed to data-focused workflows and technical documentation.

Projects

InTrack – Internship Tracking System

2026

NestJS, PostgreSQL, TypeORM, Next.js, React.js, Tailwind CSS

- Developed a full-stack internship management system with role-based access for admins, interns, line managers, and buddies.
- Implemented user management, task assignment, daily progress updates, weekly reports, feedback, activity tracking, dashboards, JWT authentication, and profile management.

TMS – Lightweight Transportation Management System

2026

Next.js, NestJS, TypeORM, PostgreSQL, Docker, Cloudinary

- Developed a full-stack TMS POC covering shipment intake, carrier quoting, load consolidation, tendering, delivery tracking, exceptions, and proof-of-delivery documents.
- Implemented Admin, Dispatcher, and Carrier portals, carrier quote comparison, capacity-aware consolidation, tender workflows, delivery status management, operational notifications, and document handling.

CSIT Connect | Live: csit-connect.vercel.app

2025

MongoDB, Express.js, React.js, Node.js

- Collaborated on a MERN-stack alumni-student platform, focusing on responsive frontend development and UI/UX implementation.
- Built Reddit-style threaded discussions with voting and role-based access for faculty and alumni job posting capabilities.

Education

Bachelor of Computer Science

Expected Jun 2027

NED University of Engineering & Technology

CGPA: 3.566 / 4.00
